SSPA Designation: Barrier Reverse Convertible (1230)

The Pricing Supplement will not be filed with a Swiss reviewing body or any other competent authority according to article 45 of the Federal Act on Financial Services (FINSA). The Product may only be offered in accordance with the Selling Restrictions as set out below. In Switzerland, these financial instruments are considered structured products. They are not collective investment schemes within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA), and are therefore not subject to the regulations of the CISA or the supervision of the Swiss Financial Market Supervisory Authority FINMA. The investors bear the Issuer's credit risk.

PRODUCT DESCRIPTION

These products are characterised by one or several Coupons, several Barriers as well as by a – albeit only conditional – redemption at the Nominal Value. The redemption at the end of the term is determined on the basis of the performance and the closing prices of the respective Underlyings: A redemption at the Nominal Value takes place as long as no Barrier Event has occurred. If a Barrier Event has occurred but at Final Fixing all Underlyings are again higher than or equal to the respective Strike Prices, the Nominal Value is repaid. If, however, a Barrier Event has occurred and at Final Fixing at least one of the Underlyings closes lower than the corresponding Strike Price, the investor receives the delivery of the Underlying with the poorest performance or a cash compensation, corresponding to the closing price of this Underlying (for details see "Redemption/Delivery").

PROSPECTS OF PROFIT AND LOSSES

Any possible gain results from the fixed Coupon. Nevertheless, there is an upper limit to the gain, as the maximum payment is the Nominal Value plus the coupon. These products have only conditional repayment at the Nominal Value defined by the individual Barriers: If a Barrier Event has occurred, the right of a repayment at the Nominal Value ceases to apply immediately. Investors should be aware that this can happen during the relevant Barrier Monitoring (period of time or point(s) of time). Accordingly, the risks are considerable; given upwardly limited chances of gains, they correspond largely to the risks of a direct investment in the Underlying with the poorest performance. The lower the closing price of the Underlying with the poorest performance after falling below its Strike Price, the greater the losses sustained. In extreme cases, i.e. when the price of the Underlying is equal to zero (0), the maximum loss can lead to a loss of all the capital invested.
Even if the performance of the Underlyings is positive and no Barrier Event has occurred, the price of the product during the term can be considerably below the Issue Price. Potential investors should bear in mind that price changes to the Underlyings, as well as other influencing factors, may have a negative effect on the value of products.

SIGNIFICANT RISKS FOR INVESTORS

Currency risks

If the Underlying or Underlyings is/are denominated in a currency other than the product's Reference Currency, investors should bear in mind that this may involve risks due to fluctuating exchange rates and that the risk of loss does not only depend on the performance of the Underlying(s) but also on any unfavourable performance of the other currency or currencies. This does not apply for currency-hedged products (quanto structure).

Market risks

The general market performance of Securities is dependent in particular on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the product.

Disruption risks

There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the products. Such occurrences can have an effect on the time of redemption and/or on the value of the products.

In the event of trading restrictions, sanctions and similar occurrences, the Issuer is entitled, for the purpose of calculating the value of the product, to include at its own discretion the Underlying instruments at their most recently traded price, at a fair value to be established at its sole discretion or indeed as worthless, and/or additionally to suspend pricing in the product or liquidate the product prematurely.

Secondary market risks

Under normal market conditions, the Issuer or the Lead Manager intend to post bid- and ask-prices on a regular basis. However, neither the Issuer nor the Lead Manager is under any obligation with respect to investors to provide such bid- and ask-prices for specific order or securities volumes, and there is no guarantee of a specific liquidity or of a specific spread (i.e. the difference between bid- and ask-prices), for which reason investors cannot rely on being able to purchase or sell the products on a specific date or at a specific price.

Issuer risk

The value of the products may depend not only on the performance of the Underlying(s), but also on the creditworthiness of the Issuer, which may change during the term of the product. The investor is exposed to the risk of default of the Issuer.
The Issuer's sole business is the raising of money by issuing securities for the purposes of acquiring assets or risks relating to assets generally. Pursuant to the Luxembourg law of 22 March 2004 on Securitisation, as amended, claims against the Issuer by the holders of a security (the "Security Holders") will be limited to the net assets of the Compartment. The net assets of the Compartment will comprise (i) the Underlying Assets, and (ii) a cash account with an initial cash account amount of zero (the "Compartment Assets"). Other than as described in the foregoing, the Issuer will have no funds available to meet its obligations. If the Compartment Assets are not sufficient, there is a risk that the Issuer will temporarily or permanently not be able to fulfil its payment obligations when due and the Security Holders may suffer a loss. The entitlement of the investors is limited to the assets of the Compartment. In particular, the investors have no recourse/claim to any other assets of Opus (Public) Chartered Issuance S.A., including the assets of other compartments or the general assets of Opus (Public) Chartered Issuance S.A., which are not allocated to the Compartment.

During the term of the Securities, the rights of the Security Holders to be paid amounts due or for delivery of the Underlying under the Securities will be subordinated to (i) discharge of any liabilities towards creditors privileged by law, in particular existing tax liabilities of the Issuer (if any), to the extent that these are due and payable and (ii) discharge of any other liabilities of the Issuer in relation to the Compartment, in particular any administrative costs and the service fee. Any such claim rank priority to the claim of the Security Holders. Payment or delivery of such amounts will reduce the amounts that are available to the Issuer to make payments to the

Security Holders.

The Company is structured to be an insolvency-remote vehicle, but it is under no circumstances insolvency-proof. If the Company fails for any reason to meet its obligations or liabilities, insolvency proceedings might be initiated. In any such circumstances, there is a risk that Security Holders may suffer a loss.

The Security Holders may be exposed to competing claims of other creditors of the Company, the claims of which have not arisen in connection with the creation, operation or liquidation of a Compartment if foreign courts, which have jurisdiction over assets of the Company allocated to a Compartment do not recognise the segregation of assets and limited recourse in that respect.

The Issuer is party to contracts with a number of third parties who have agreed to perform a number of services in relation to the Compartment Assets. In particular, the calculation agent, the paying agent and the depository agent have agreed to provide services with respect to the Compartment Assets. If any such third party fails to perform its obligations under any relevant agreement, the Security Holders may be adversely affected.
